CD45	HI30	cFluor V547 ³	R7-20012																																		
CD56	5.1H11	cFluor R720 ³	R7-20090																																		
Test Dilution:	5µl per test																																				
Application:	Flow cytometry																																				
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% BSA																																				
Storage:	2-8°C and protected from light. Do not freeze																																				

PRODUCT DESCRIPTION

Cytek cFluor™ TBMNK Kit allow for the identification of lymphocytes, total T cells, helper T cells, cytotoxic T cells, NK T cells, B cells, NK cells, total monocytes, nonclassical and classical monocytes in human peripheral blood mononuclear cells and in whole blood.

CD3 is expressed on all mature T cells, NK T cells, and some thymocytes. CD3, a part of the CD3/T cell receptor complex, plays a role in antigen recognition, signal transduction, and T cell activation.

CD4, is expressed on most thymocytes, a major subset of T cells, and on monocytes/macrophages. Functionally, CD4 is associated with thymic differentiation, in conjunction with MHC class II molecules in antigen recognition and with signal transduction.

CD8 is found on thymocytes, on a subset of T cells and on NK cells. This molecule acts as a co-receptor in MHC class I molecules in antigen recognition, has a role in T cell activation and in thymic differentiation.

CD14 is also known as a high affinity LPS receptor and is highly expressed on monocytes and macrophages. It is also expressed on granulocytes, but at a lower level. In addition, CD14 is found on interfollicular dendritic cells, reticular dendritic cells, and Langerhans cells.

cFluor™ TBMNK Kit, 8 Color

Technical Data Sheet

CD16 is expressed on NK cells, monocytes and macrophages in the form of CD16a. Another form of CD16, CD16b is expressed on neutrophils. CD16 engagement of IgG leads to NK cell activation, antibody-dependent cell-mediated cytotoxicity (ADCC) and phagocytosis

CD19 is expressed in the B cell lineage, from pro-B to blastoid B cells. However, it is absent on plasma cells. It is also expressed on follicular dendritic cells. CD19 is involved in B cell development, activation, and differentiation.

CD45 is expressed on all hematopoietic cells, except erythrocytes and platelets. CD45 is a signaling molecule that is involved in cellular proliferation, differentiation and in regulation of immune cell functions.

CD56, within the hematopoietic system is expressed on NK cells and NKT cells, a subset of T cells. In the nervous system, CD56 is expressed by neurons and plays a role in the homotypic adhesion of neural cells.

RECOMMENDED USAGE

Human peripheral mononuclear cells (PBMC) or whole blood have been tested to validate the performance of this kit. For staining procedures, product data, and gating strategy, please refer to the Reagents and Protocols sections of our website at www.cytexbio.com.

¹ Cytex dye cFluor R780 and its conjugates were developed, manufactured and commercialized by BioLegend, Inc. under the trademark APC/Fire750™

²

² Fluor conjugated antibody manufactured and supplied by BioLegend Inc.

³ cFluor™ V547, cFluor™ B515, cFluor™ R668 and cFluor™ R720 are equivalent to CF®405L, CF®488A, CF®647 and CF®700 respectively, manufactured and provided by Biotium, Inc. under an Agreement between Biotium and Cytex (LICENSEE). The manufacture, use, sale, offer for sale, or import of the product is covered by one or more of the patents or pending applications owned or licensed by Biotium. The purchase of this product includes a limited, non-transferable immunity from suit under the foregoing patent claims for using only this amount of product for the purchaser's own internal research. No right under any other patent claim, no right to perform any patented method, and no right to perform commercial services of any kind, including without limitation reporting the results of purchaser's activities for a fee or other commercial consideration, is conveyed expressly, by implication, or by estoppel.

For Research Use Only. Not intended for use in diagnostic procedures.
