

# cFluor™ BYG781 Anti-Human CD4 (SK3)

PRODUCT DETAILS	
Catalog Number:	R7-20161 (100 tests)
	R7-20162 (25 tests)
Reactivity:	Human
Clone:	SK3
Format:	cFluor™ BYG781
Isotype:	Mouse IgG1, κ
Volume Per Test:	5 μL / test
Application:	Flow cytometry
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and
	0.2% BSA (Origin USA)
Storage:	2-8°C and protected from light.
	Do not freeze

### **PRODUCT DESCRIPTION**

The SK3 monoclonal antibody binds to human CD4, a 59-kDa type I transmembrane glycoprotein in the immunoglobulin superfamily. The CD4 molecule is expressed predominantly on thymocytes and a subpopulation of mature T-helper lymphocytes. It is also present on monocytes at low levels<sup>1,3</sup>. CD4 plays a role in cell-cell interaction by acting as a co-receptor for MHC class II in antigen recognition. CD4 also has been shown to bind glycoprotein 120 on external envelope of HIV<sup>2</sup>. The antibody was conjugated to a fluorophore and purified by affinity chromatography.

### **RECOMMENDED USAGE**

Each lot of this antibody is quality control tested using flow cytometric analysis. For flow cytometric staining, the suggested use of this reagent is 5  $\mu$ L per 1 million cells in a staining volume of 100  $\mu$ L. If whole blood is analyzed, then use 5  $\mu$ L per 100  $\mu$ L. It is recommended that users titrate the antibody to obtain the optimal result for their specific application.

## **PRODUCT DATA**

Human peripheral blood was stained with cFluor<sup>™</sup> BYG781 Anti-Human CD4 (clone SK3) (filled histogram) or cFluor<sup>™</sup> BYG781 mouse IgG1,  $\kappa$  isotype control (open histogram). Data shown is gated on lymphocytes.

Spectral signature of cFluor™ BYG781 from a Cytek® Aurora 5 laser system equipped with 355 nm, 405 nm, 488 nm, 561 nm and 640 nm lasers using CytekAssaySettings.
